

1. Ingest CSV files

Apache Airflow (Orchestrator)

Python ETL

Extract CSVs
Validate Data
Load to Staging
Record Metrics

2. Load
Raw Data

Database

PostgreSQL

Staging Schema

Raw Tables
(source data)

Analytics Schema

Facts & Dimensions
(modelled data)

3. Transform
& Test Data

**DBT
Transformation**

dbt deps
(Install Dependencies)

dbt run
(Transform Models)

dbt test
(Data Quality Tests)

4. Write
Modeled Data

5. Log Execution
& Metrics

7. Data Quality Metrics

6. Log Table-Level
Metrics

8. Pipeline Metrics

Pipeline Audit Tables (PostgreSQL)

- pipeline_audit
- table_load_metrics

(Execution logs, status, counts, durations)

Pipeline Metrics CSV

pipeline_metrics.csv
